## FOR HOUSE AND CONSERVATORY

In our 120 Greenhouses, devoted to Potted Plants, are probably grown the largest assortment of ornamental plants under glass in America, most of which are distributed through Retail Florists.

For over 75 years we have collected from all parts of the world a Treasure in Exotic Plants which has become world famous. However, many Flower Shops do not have the facilities to feature some of these rarer plants because of their perishable nature, and it is the purpose of this list to keep them available to the Plant fancier if they cannot be obtained from your neighborhood florist.

**ORDERS:** Because of limited mother stock, orders are accepted with the understanding that they will be shipped only if and when saleable plants are available beyond needed propagating stock. Minimum order \$3.00. Sales can be made from this list only.

**SHIPMENTS:** Plants will be shipped in paper pots wherever possible, to reduce shipping weight—unless requested in clay pots. We try to avoid shipping tender plants during cold weather. Shipments usually travel Express Collect, but smaller packages can be sent Parcel Post at customers' risk, provided postage is included with order (10c per each dollar of order). We can ship by air if charges are guaranteed.

**TERMS:** Cash with order, except for established accounts 30 days net from date of invoice. Claims for damage in transit on Express shipments must be filed with Express Co. We will exercise all care to ship safest way, but because of the tender nature of many Exotic Plants we cannot assume responsibility for their safe arrival and future growth.

This list does not include all of the many varieties of Tropical Plants we are growing or are experimenting with, but offers a selection of the best. For additional plants not listed and other information, please write Department E.
